NATURE has generously awarded Jūrmala with unique medicinal resources. Jūrmala is a balneological and a climatic resort - here you can find both healing mud, as well as a mild maritime climate combined with the pine forest air rich with phytoncides. Here the subsoil hides sulfurated, bromide and sodium chloride mineral water, which has created large underground reserves of therapeutic peat, and you can find precious sapropel mud in the lakes.

Jūrmala is known as a medical resort since the late 18th century, when the research of folk medicines such as hydrogen sulfide springs, peat and sapropel mud allowed to set up the first healing institutions in Ķemeri. Today the treatment institutions of the Jūrmala resorts offer a wide range of healing, rehabilitation and SPA services, and it is the ideal place for combining leisurely relaxation with healthcare. Jūrmala's medical institutions are renowned for the quality of services and professional specialists.

The Jūrmala hospital offers diagnostic programs, leg vein treatment with laser surgeries, Bariatrics or stomach reduction surgery, maternity services in comfortable conditions, also offering water birth. Jūrmala is home to the Global Virotherapy Cancer clinic where cancer is treated with the RIGVIR® virus. Oncolytic virotherapy is a cancer treatment that uses a virus which has the ability to find and destroy cancer cells in the human body.

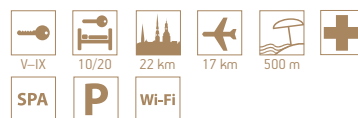

ALVE HOTEL

Resort hotel ***

Basing upon the long-term practice, specialists of the health centre VALE have developed various health restoration programs: complex organism cleaning program, juice therapy, detox program. By the end of the Health restoration program, every patient receives a personal eating plan and recommendations, developed by the centre's specialists according to every organism's individual needs. Even if you are not planning to change your life and use the principles of nature-therapy later on in your life, our health restoration programs will serve as a powerful factor for the preventive measures of illnesses, will strengthen organism's protective forces, bring in an extra supply of cheerfulness and a good mood.

RECOVERY PROGRAM

We invite you to try our new programme **"Express cleansing of body"**! A one-day programme has been developed for busy people with no extra time.

SIVA

Resort rehabilitation centre

SIVA has become one of the most advanced rehabilitation centres in the Baltic States. Unique location on the seacoast, professional staff and modern treatment provides excellent conditions for rest and rehabilitation that has been highly appreciated by tourists for many years. Our rehabilitation services are also applied to all customers who have reduced mobility as there are adapted hotel and treatment rooms, gym, lift in the swimming pool, as well as the elevator between floors. Access to the beach by wheelchair is convenient and easy.

RECOVERY PROGRAM

Our professionals will design individual rehabilitation program for each client taking account of his state of health and the doctor's recommendations. Price per day is from 38 – 65 EUR. Rehabilitation program includes accommodation in single or twin room, meals 3 times a day, a doctor and specialist consultations and classes, procedures, day and night medical carer support. Customers can choose the length of the rehabilitation course (minimum 3 days), but we recommend to enjoy rehabilitation services for at least 7 – 21 days to promote health and well-being.
